ClearOne®

VIEW® Lite Video Walls

VIEW® Lite is a very competitively priced professional multimedia streaming solution for existing IP networks; providing essential functionality to meet the needs of simple AV over IP applications while delivering superb price-to-performance value.

> Provides a flexible solution to combine multiple video streams on one or more displays in any layout combination.

> The VLite iPAD app lets you configure video walls up to 16x16 with a simple graphical user interface.

> Easily scalable by adding and removing devices.

> Avoids the purchase and maintenance of additional video processing equipment.

> Using drag-and-drop to assign sources makes video walls a snap to build.

> Works with VIEW Lite Encoder EJ1000; VIEW Lite Decoder DJ1000 and VIEW Lite Controller CJ1000.

Video walls without the complexity
Build video walls scalable up to 16x16 without purchasing additional expensive video wall processing equipment or software licenses.
